

## **The 10<sup>th</sup> Nelson Bay Sea Slug Census**

**Sunday 20<sup>th</sup> March 2016**

**We want *YOU* to join the Sea Slug hunt!**

To take part all you need is a dive buddy, and an underwater camera.

The census involves taking one photo of each species of sea slug you find on the 20<sup>th</sup> March within the Port Stephens estuary. Your involvement will help with documentation of Port Stephens' amazing variety of sea slug species.

### **Census Guidelines**

1. Each dive team should send in **one photo** for each species of sea slug they encounter on the census date. You don't need to identify the slugs, just take their photos!
2. Only species with no visible shell are eligible (i.e. no bubble shells, or umbrella shells)
3. Photos **must** be taken in Port Stephens bay on **20<sup>th</sup> March 2016**.
4. Photos should be cropped around the nudi and shrunk to around 640x480 pixels, and submitted by email to [seaslugcensus@gmail.com](mailto:seaslugcensus@gmail.com) by **Sunday 27<sup>th</sup> March 2016**.
5. Emails must give the names of the dive team, and details of the sites where photos were taken.
